

CONTENTS OF PREVIOUS VOLUMES

Volume 1

- W. P. COLLINS and J. F. HENNAM: Radioimmunoassay and Reproductive Endocrinology
J. M. WHITE: Haemoglobin Structure and Function: Its Relevance to Biochemistry and Medicine
S. E. BARNES, E. M. BRYAN, D. A. HARRIS and J. D. BAUM: Oedema in the Newborn
M. C. SCRUTTON and V. L. SCHRAMM: Modulation of Enzymic Activity
D. J. GALTON and D. J. BETTERIDGE: Defects in Enzyme Regulation: a New Approach to Metabolic Disorders
M. NORMAN: Protein Synthesis in Disease: Abnormalities of Translation as Causes and Effects of Human Disease
D. W. MOSS: Isoenzymes in Medicine

Volume 2

- D. ROBINSON: Carbohydrase Deficiencies in Storage Diseases
M. FOLDI and J. R. CASLEY-SMITH: The Roles of the Lymphatics and the Cells in High-Protein Oedemas
M. L. CUZNER and A. N. DAVISON: The Scientific Basis of Multiple Sclerosis
B. L. FANBURG: Biochemical Correlates of Lung Disease
F. I. SAMAHY: Molecular Aspects of Muscle Disease
H. BRAUNSBERG: Hormonal Mechanisms in Human Breast Cancer
J. L. WITTLIFF: The Steroid Receptors of Experimental Mammary Tumors and their Relationship to Those of Human Breast Carcinoma

Volume 3

- L. GALZIGNA: The Possible Molecular Basis for Memory Processes in the Central Nervous System
N. H. HUNT and T. J. MARTIN: Hormone Receptors and Cyclic Nucleotides; Significance for Growth and Function of Tumors
B. CANNON and B. W. JOHANSSON: Nonshivering Thermogenesis in the Newborn
P. J. QUINN: Biochemical and Immunological Prospects for Male Contraception
E. CARAFOLI and I. ROMAN: Mitochondria and Disease
D. J. H. BROCK: Feto-specific Proteins in Pre-natal Diagnosis

Volume 4

- E. H. MORGAN: Transferrin, Biochemistry, Physiology and Clinical Significance
H. C. SLAVKIN, M. ZEICHER-DAVID and M. A. Q. SIDDIQUI: Molecular Aspects of Tooth Morphogenesis and Differentiation
R. A. HARKNESS *et al.*: The Biochemistry of Inflammation: A Selective View of Mechanisms and their Controls
R. W. BALDWIN, M. J. EMBLETON and M. R. PRICE: Monoclonal Antibodies Specifying Tumour-Associated Antigens and their Potential for Therapy
A. JAKOB: Hormonal and Metabolic Control of Hepatic Carbohydrate Metabolism

Volume 4

- E. H. MORGAN: Transferrin, Biochemistry, Physiology and Clinical Significance
H. C. SLAVKIN, M. ZEICHER-DAVID and M. A. Q. SIDDIQUI: Molecular Aspects of Tooth Morphogenesis and Differentiation
R. A. HARKNESS *et al.*: The Biochemistry of Inflammation: A Selective View of Mechanisms and their Controls
R. W. BALDWIN, M. J. EMBLETON and M. R. PRICE: Monoclonal Antibodies Specifying Tumour-Associated Antigens and their Potential for Therapy
A. JAKOB: Hormonal and Metabolic Control of Hepatic Carbohydrate Metabolism

Volume 5

- P. J. THOMAS and M. ANI: The Sexual Differentiation of the Brain
 R. I. C. SPEARMAN: The Biochemistry of Skin Disease
 P. F. TORRENCE *et al.*: Molecular Aspects and Biological Functions of Interferon
 V. MARKS and L. M. MORGAN: Gastrointestinal Hormones
 M. A. CAWTHORNE: Metabolic Aspects of Obesity
 B. JACOBSON: Effect of Teratogens on Connective Tissue Development

Volume 6

- T. C. IANCU: Iron Overload
 D. A. BENDER: Biochemistry of Tryptophan in Health and Disease
 M. HAMOSH and P. HAMOSH: Lipoprotein Lipase: Its Physiological and Clinical Significance
 S. ELÖDI and P. ELÖDI: Surface Governed Molecular Regulation of Blood Coagulation
 N. R. FARID, R. BRIONES-URBINA and J. C. BEAR: Graves' Disease — The Thyroid Stimulating Antibody and Immunological Networks
 A. R. DLUZEWSKI, M. J. HALSEY and A. C. SIMMONDS: Membrane Interactions with General and Local Anaesthetics: A Review of Molecular Hypotheses of Anaesthesia

Volume 7

- R. NATH *et al.*: Molecular Aspects of Idiopathic Urolithiasis
 P. KNOX: The Cell Surface in Health and Disease
 P. ENGLEBIENNE: The Serum Steroid Transport Proteins: Biochemistry and Clinical Significance
 J. H. BARNES: The Physiology and Pharmacology of Emesis
 T. W. SMITH: The Mechanisms of Pain and Opioid-Induced Analgesia

Volume 8

- A. K. ROY and B. CHATTERJEE: Molecular Aspects of Aging
 B. HALLIWELL and J. M. C. GUTTERIDGE: The Importance of Free Radicals and Catalytic Metal Ions in Human Disease
 O. EPSTEIN (Editor): Molecular Aspects of Primary Biliary Cirrhosis
 J. H. BOTTING, M. J. CURTIS and M. J. A. WALKER: Arrhythmias Associated with Myocardial Ischaemia and Infarction
 J. L. HARWOOD and R. J. RICHARDS: Lung Surfactant
 A. B. MALIK and S. K. LO: Thrombin-Endothelial Interactions: Role in Lung Vascular Permeability

Volume 9

- I. MCLEAN BAIRD and M. H. ORNSTEIN (Editors): Dietary Fibre in Health and Disease
 H. F. BRADFORD and D. W. PETERSON: Current Views of the Pathobiochemistry of Epilepsy
 J. S. BOND and R. J. BEYNON: Proteolysis and Physiological Regulation
 P. J. BUTTERWORTH: Phosphate Homeostasis
 B. H. BILLING (Editor): Advances in Bilirubin Metabolism
 P. LIBBY: The Active Roles of Cells of the Blood Vessel Wall in Health and Disease

Volume 10

- N. J. RUSSELL and P. GACESA: Chemistry and Biology of the Alginate of Mucoid Strains of *Pseudomonas Aeruginosa* in Cystic Fibrosis
A. D. THOMSON (Editor): Mechanisms of Alcoholic Liver Damage
G. BENGA (Editor): Biomembranes and Diseases
S. SAKAMOTO and M. SAKAMOTO: Degradative Processes of Connective Tissue Proteins with special emphasis on Collagenolysis and Bone Resorption
M. WALLIS: The Molecular Basis of Growth Hormone Deficiency
N. C. OLSON, W. L. SALZER and C. E. McCALL: Biochemical, Physiological and Clinical Aspects of Endotoxemia
